Dear interested sponsor,

We are a robotics club of 150+ high school students who are passionate about becoming STEM leaders. Through our weekly meetings, we aim to foster skills needed to succeed in modern STEM fields. With the help of our teachers and student mentors, we compete in the VEX Robotics Competition (VRC)¹. Students participate in more than 250 hours of training, skills development, research & design, building and testing before competing in regional, provincial, national and international competitions.

Here is a recent news article which covered the club and its numerous community initiatives: [New Oakville robotics club now listed among best in the world](#)

Some of our team's collective [past accolades](#) include:

2023-2024: Over Under	2024-2025: High Stakes
 Global Finalist <i>MathWorks FollowThePath Challenge</i>	 3rd in Division at VEX World Championships <i>Glenforest iDESIGN 365 VEX Robotics Competition</i>  Global Finalist <i>Google Team Marketing Challenge</i>  Provincial Finalist <i>1 of 2 Public HS team to achieve provincial finalist</i>  2x Excellence Award <i>Glenforest & Brampton VEX Robotics Competition</i>  Top 5 Provincial Skills <i>VEX Robotics Competition Ontario</i>

There are many costs associated with participation in the VRC Competition, including tools and materials to build the robot, building and equipping our pit for competition, travel and accommodation for competition events, team uniforms and marketing materials. As such, corporate sponsorship is essential to be successful in our pursuits. Contributions to our club may be financial or may be in the form of materials or services in-kind. Sponsors will receive regular updates on the team's progress, will be publicly acknowledged on the team's website and printed materials, and (with permission) will have their logos displayed on team shirts, banners and in the team pit. In addition, our social media team will create promotional content to showcase your company and organization.

Adult mentors are an important part of the VRC, and often come from corporate sponsors. Mentors with a variety of skills and experience are required, including CAD, manufacturing, electrical, mechanical, programming, construction, graphic design, logistics planning, video production, web design, project management, marketing and business planning.

1. VEX Robotics is an organization that aims to inspire learners of all ages and backgrounds to recognize the importance of creative problem-solving and its role in shaping a better future through hands-on robotics competitions. (<https://www.vexrobotics.com/>).

Levels of Sponsorship

Up to \$500	Bronze 🥉	Small logo or company name displayed on uniforms and websites.
\$500 to \$1000	Silver 🥈	Small logo or company name displayed on the website, printed materials, uniforms, signs, banners. Gratitude posts on social media.
\$1000 to \$2500	Gold 🥇	Medium-sized logo or company name displayed on website, printed materials, uniforms, signs, banners and robots. Multiple dedicated social media posts.
\$2500+	Diamond 💎	Logo or company name prominently displayed on websites, printed materials, uniforms, signs, banners, team uniforms, and robots. Constant spot on all social media posts and a media campaign over the course of the season.
